

# Redback Powered Speakers

**Product Code: SW3**

## **Redback 5.25" Powered Speaker 30W White**

Great for classrooms, lecture theatres, boardrooms, function areas, etc. System comprises of one active speaker with inbuilt stereo amplifier and one passive speaker which is powered from the active speaker. These high power music speakers feature exceptional sound quality for professional sound reinforcement. Available with 130mm, 165mm or 200mm bass drivers they feature a stylish contoured profile and quick mounting bracket which will suit wall or mobile mounting.

An in-built amplifier allows easy integration into existing systems with only line level signal required for operation. The ported bass reflex enclosure produces outstanding sound reproduction ideal for areas requiring high quality sound reinforcement. Rear mounted volume, bass and treble controls allow easy adjustment, even after installation. RCAs provide easy connection to existing audio sources. Mains power for the amplifier is connected via IEC socket on the rear panel. Each speaker can be switched off when not in use.
