PLEASE NOTE: More custom size Data Projector Cages are available on request phone you re-seller for sizes and pricing.

Having a security cage gives the owner piece of mind the Data Projector will be there in the morning. The Cage includes the STDM mounting system and all its advantages. The cage has a spot welded steel construction with a locking bar that can be placed Centre, Left or Right allowing for all Lens offsets. Utilizing a unique designed Sheer Nut to secure all parts of the cage once installed the only way in is via the padlocked opening with the key or grinding and cutting equipment.

Note: Size requirements are determined per the Data Projector physical outer dimensions. To order, line up the dimensions of the projector with the appropriate cage size.
Allow 10-20mm of clearance around the Data Projector.

A **UNIM** Base can be ordered separately for the difficult install if required.
