

## Height Adjustable Frame

Product Code: HAF, HAFA, HAF5

**HAF (Height Adjustable Frame)**

**HAFA (Height Adjustable Frame Accessories)**

**HAF5 (Warranty Uplift to 5 Years total)**

The unique design of this kit will allow your new Interactive White Board or Standard White Board and Data Projector to be mounted in three different ways.

1. **Mobile Trolley**
2. **Wall Mount**
3. **Floor Mount** *Note: This option requires no drilling into a Wall or Roof perfect for rooms that may contain Asbestos!*

All three options come with 500mm of finger tip height adjustment.

To future proof your class room all three options can be retro fitted at a later date to allow for change in teaching techniques or classroom updates.

This simple to construct frame comes with all hardware required to mount every ultra short throw data projector currently available on the market. The universal board clamps will allow for vertically all Interactive White Boards or Standard Whiteboards to be mounted in under a minute.

With only simple hand tools required for construction, this system takes the engendering and complexity out of mounting Data Projectors and Interactive White Boards. For mounting to a surface refer to the relevant Australian Standards.

The easy to follow guide will walk you through construction of the frame. Direct you to how to mount the data projector in relation to the board.

The cable kit contains 5m VGA, 1.5m Power Extension, 2m 3.5 ST RCA, 5m RCA Video leads and a four outlet power board. Connect all relevant leads plug the power board into a GPO (240v socket) connect the data cable and you are ready to use your new electronic teaching aid.

One of our user friendly design features is the **Accessory Pack (HAFA)** which includes the Laptop Arm. This Arm sits out from the frame allowing a Laptop to be used where ever the frame is situated. Also the universal speaker brackets allow the speakers to be mounted to the sides of the frame.
