

Short Throw Wall Mount

Product Code: STWM-1525

Short Throw Wall Mount - 1525mm long Pole

This universal wall mount is over engineered for its purpose and is extremely strong. The wall mounting plate is 10mm thick 120mm wide and 400mm long. The 1525mm tube is 50.8mm round and 2mm thick. The reasoning behind its strength is once installed your Data Projector will be as stable as possible even in portable classrooms or high vibration areas.

Simple to install, feed the cables through the center of the tube, screw the base to the wall through the numerous pre-drilled holes. Then place the cover over the base plate for a clean streamline appearance. The only thing to do then is to mount the Data Projector to the universal mounting head.

Features:

- 1525mm pole
- Solid steel construction
- Colour - Surfmist (off white)

Uses:

- All short throw brands and models up to 5kgs
- Portable class rooms (high vibration areas)
