

Universal Data Projector Mount

Product Code: UNIM

Universal Data Projector Mount

Proudly Australian built and designed around a solid steel construction. Our Universal Projector mount comes fully assembled out of the box ready for mounting. The projector mounting head has been designed with 20° of lateral and 25° of tilt to fit virtually all brands and models of projectors.

The Base has been designed for the difficult room installation eg: False ceilings, I beam's, exposed rafters and other architecturally designed ceilings. The base adjusts 180° vertically and 360° horizontally enabling it to mount to a surface of any angle and tilt. Complementing this is the advantage of up to 3m of drop available using our range of Extension poles refer to EXP description.
